

Create a Smarter Workplace With Innovative Printing UX

Boost productivity and ease customization with the industry's first printing UX system powered by Android™

Samsung SMART UX CENTER is not just a UI platform but a totally new kind of ecosystem comprising of apps, an app center, and development support. Boasting the industry's first Android-based printing UX system that is optimized for copiers, the Samsung Smart UX Center provides easy customization to meet unique customer needs along with worry-free security and better productivity for a smart workplace that can do more in less time.

Implement the essential solutions for a seamless workflow

Easy customization and improved productivity

- Easy UI customization comparable to smartphone app use
- 26 apps and 10 widgets available as out-of-box apps or through Printing App Center
- Continuous development and release of more apps and widgets
- Able to create a profile that can be shared with various fleets

Printing App Center

The Printing App Center acts as a web portal, enabling administrators or ITDMs to download various apps and widgets with access through devices or a PC.

Multi-layered security

Separated System Security Management

- Separated system between Android and main platform:
 - Critical data storage protection in the main platform
 - Android application accessibility denied to main system or storage
 - 256-bit encryption to secure data and image overwrite up to 9 times

Essential apps and widgets

As of May 2015, 26 apps and 10 widgets are available for download to meet unique business needs and increase productivity. The following apps are a select few of the many apps available in the Printing App Center.

For Users

Workbook Composer

Provides a convenient, time-efficient scanning function that automatically exports multiple selected document or text components.

HancomOffice®

Boosts productivity by enabling viewing and editing of Microsoft® Office® and Hangul Word Processing (HWP) files without a PC.

Language Selector Widget

Provides ease-of-use for multi-language businesses while increasing productivity with access to 24 languages and up to four languages on screen.

Send Anywhere

Enhances communication across devices and platforms for simplified, secure data sharing without login/registration between an MFP and a PC/mobile device.

For Administrators

SyncThru™ Web Viewer

Saves time and operating costs with one-click access to admin functions without a PC, network, IP address or web browser.

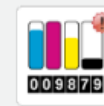

Smart Color Manager

Delivers greater impact when color use is critical and enhances professional documents with easy color customization at the printer.

Screen Memo Widget

Speeds delivery of IT admin announcements or service contact information and saves time by retaining change history for future use or backup.

Toner Status Widget

Saves consumables management time with real-time, on-screen status updates and customized toner ordering method selection.
