

# **Attention!**

**In order to print this two-page flyer, please follow these steps:**

- 1) Personalize the text and logo area** with your custom copy and logo.
- 2) Delete this page** if you don't want it printed.
- 3) Export a PDF file before printing**, otherwise embedded images could leave artifacts on the page. Then print from the PDF file.

# Create an Efficient Workplace with Easy-to-use, Serverless Printing Solutions

**SAMSUNG**  
**Business Core™ Printing Solutions**

**More than just print. Whatever your business needs, make it an efficient workplace with our easy-to-use, cost-effective solutions!**

## **Samsung Business Core™ Printing Solutions**

A cost-efficient, highly usable document management solution with A4 XOA web device compatibility. By using an XOA embedded device as a server, up to five XOA web devices can be connected with a single license\*, reducing IT expenses without the cost of a dedicated server. These solutions are easy to use without the help of IT specialists, so that organizations with limited resources can work seamlessly and efficiently.

\* Note: One XOA web device enabler supports up to five XOA web devices. In order to use the XOA web enabler, one or more XOA-E-equipped devices and the Usage Tracker, SecuThru™ Lite 2 or SmarThru™ Workflow Lite licenses are required.

## **Implement the essential solutions for a seamless workflow**

### **SecuThru™ Lite 2**

Safeguard confidential documents and company data with secure authentication and release. Plus, reduce costs through pull printing by eliminating unclaimed print jobs.

### **SmarThru™ Workflow Lite**

Automatically distribute scanned documents to multiple predetermined destinations to reduce manual and repetitive document work. Users can also transmit scanned documents to locations based on zonal text content or barcode scans.

### **Secure Login Manager**

Protect valuable devices from unauthorized use with several different methods of secure authentication.

### **Usage Tracker**

Control and lower printing expenses through the easy and intuitive tracking of all device utilization by users. Receive customized email notifications for remote, proactive monitoring as well.

### **Cloud Connector**

Print from and scan to various cloud services supporting a variety of file formats to save users' valuable time.
