Outstanding Achievement in Innovation: Samsung NFC technology

Enjoy hassle-free mobile printing with NFC technology

Samsung NFC Print: Tap, print and go

- Connect and print with ease using Samsung's monochrome multifunction printer (MFP) with advanced Near Field Communication (NFC) technology.
- Just tap and then print, scan or fax documents from a mobile device[1].

Google Cloud Print™ ready

- Register your MFP easily to your Google® account for Google Cloud Print by tapping your mobile device[1].
- Print emails, photos and PDF files anytime, anywhere with Google Cloud Print. Users can access Google Cloud Print from the Samsung MobilePrint app, too.

Samsung MobilePrint app: Advanced mobile printing with more options

- Print with powerful features, including N-up printing, image size adjustment and support for mobile scan and mobile fax.
- Print various formats and types of documents, such as gallery images, Microsoft® Office® documents, Adobe® PDFs, web pages, e-mail and Google Docs, along with Facebook® content.
- Fix print errors from your smartphone using visual troubleshooting. Just tap when a print error occurs and a video clip guides you through fixing jams, empty toner and more.

Direct printing without an app on Samsung GALAXY devices

- Print from GALAXY S® series devices without needing an app[2].

Print diverse media with high speed and quality

High-speed printing and image processing

- Print in speeds of up to 28 pages per minute (ppm) in A4, with a 600 MHz ARM® Cortex™-A5 core processor and 128 MB memory.

Sharp and professional document quality

- Print sharp text and clear images using Rendering Engine for Clean Pages (ReCP) technology.
- Enjoy a 4,800 x 600 dots per inch (dpi) effective resolution.

4-in-1 versatility

- Perform print, copy, scan and fax functions with an all-in-one (AIO) device.

Diverse printing choices for professional documents

- Handle a wide range of media, up to 220 grams per square meter (gsm), such as labels, cardstock and envelopes, with the multipurpose tray.

Cut costs while lowering energy and toner usage

Professional eco solution

- Automatically activate 2-up (two pages on one side of the paper) and duplex printing, toner-save mode and the option to skip blank pages with the One Touch Eco Button.
- Remove text or images and also change the layout design, such as N-up printing, without changing the original documents before printing with Easy Eco Driver.

Low total cost of ownership (TCO)

- Achieve optimal cost per page with a starter toner cartridge (1,500 standard pages) with higher toner yield than average in the market (typically 700 - 1,000 standard pages) and a replacement toner cartridge (3,000 standard pages) with high toner yield. Because the higher toner yield cartridge requires replacements less frequently, it is the preferred choice for businesses with heavier printing volumes.

[1] Mobile devices need to support the NFC feature.
[2] There is also no app needed for iOS®-supported devices using AirPrint™.
